- Operating baggage systems and sortation centers
- Preventive maintenance and diagnostics
- Operating HVAC and other facility plant systems
- Gate operations
- Asset management
- Parts management
- Program and construction management
- Full turnkey services

IOPS[®] Monitoring and Management Tool

Using JBT's real-time asset monitoring and operational management tool, iOPS, we can help you manage your assets and personnel. With iOPS, you get actionable information, on your mobile or PC device, that provides you with equipment status, diagnostic tools, operations monitoring, video streaming from key areas, usage, fault histories, and much more.

Contact JBT and learn how we can help with your operations and maintenance needs.

JBT Airport Services for Gate and Terminal Maintenance

Let the JBT Airport Services experts help you with:

Turnkey BHS Projects: From design, project management, installation, to commissioning and turnover, JBT is ready to manage your BHS project.

BHS: Baggage Handling System — JBT operates, maintains, designs, upgrades, refurbishes and manages BHS systems and projects.

EAM: Enterprise Asset Management — The Airport Services specialists from JBT have years of experience helping manage vital airport assets. We can help with repair / replace decisions, spare parts management, full-service on-site maintenance, 24/7 monitoring, preventive maintenance programs, and equipment operations.

CMMS: Computer Monitoring Management Systems — JBT iOPS® provides real-time, actionable information on your gate and terminal equipment to your office and mobile devices.

MEPS: Mechanical, Electrical, Plumbing, and Structural — JBT monitors, maintains, and operates most of the systems inside terminal facilities as well as managing construction projects.

HVAC: Heating, Ventilation, and Air Conditioning — JBT maintains and operates central air systems, chillers, air handlers, ducting, and point-of-use preconditioned air units.
