

A SMART MOVE FOR THE FMCG INDUSTRY

The fast moving consumer goods (FMCG) industry faces constant pressure to manage high-volume inventory, meet rapid delivery demands, and minimize operational inefficiencies. Mobile automation from JBT can optimize warehouse and supply chain processes by speeding up order fulfillment, improving inventory accuracy, and reducing manual labor costs.

WHY MOBILE AUTOMATION IS A SMART MOVE:

- **Reduce warehouse labor expenses**—equivalent labor rate of \$4 per hour
- **Increase productivity by 10%-20%** by getting the right materials to the right place at the right time
- **Increase operational efficiency by 20%-50%** by automating repetitive tasks, reducing downtime, and optimizing routing and scheduling

WHY PARTNERING WITH JBT IS A SMART MOVE:

7,000+ vehicles operating globally—700+ systems with millions of hours of stable operation—40+ years of application knowledge

- **Proven Technology From Industry Pioneers:** Unparalleled industry expertise from over four decades of designing and deploying high-quality, precision-engineered mobile automated systems
- **Solutions Tailored to Your Business:** A diverse range of automation solutions—including vehicles and fleet management software—that can be tailored to meet the FMCG industry's unique needs
- **Safety First and Always:** Safety starts with design then continues through implementation and support to protect your company's most valuable asset: your people
- **Exceptional Service Everywhere:** World-class customer support throughout the entire life cycle ensures your system continues to deliver superior results

Areas of Expertise

- Personal care, baby, family, and household products
- Just-in-time delivery of raw materials and packaging supplies
- Material flow modeling
- Aerosol, hazardous materials, and incompatible products

Applications

- Raw materials movement and warehouse storage
- Work-in-process (WIP) movements
- Finished goods (post-palletizer) movement and warehouse storage
- Trailer loading/unloading
- Roll transport, storage, and retrieval
- Empty pallet replenishment
- Pallet flow and shuttle

mōt.OS®

FLEET MANAGEMENT SOFTWARE

JBT mōt.OS makes every mobile automation system SIMPLE, SCALABLE, and SUSTAINABLE

Our innovative software platform delivers seamless integration, transforming logistics and manufacturing operations.

SIMPLE

- User-friendly automation platform
- Intuitive monitoring and analytics
- Seamless horizontal and vertical integration

SCALABLE

- Fleet interoperability with performance and safety in scope
- Management of hundreds of vehicles and thousands of storage locations
- Site-to-enterprise mobile robot asset management

SUSTAINABLE

- Maximized total life cycle value via equipment and software asset management
- Flexible and redeployable technologies
- Decades of experience in complex automation environments
