

**AUTOMATED
SYSTEMS**

A SMART MOVE FOR WAREHOUSING

Warehouses face constant pressure to improve efficiency, reduce errors, and keep up with increasing demand, all while managing labor shortages and rising costs. Mobile automation solves these challenges by streamlining inventory management, speeding up order fulfillment, and enhancing worker safety. And with JBT, you can outfit your entire operation from one impressive portfolio to support your exact needs.

WHY MOBILE AUTOMATION IS A SMART MOVE:

- **Reduce warehouse labor expenses**—equivalent labor rate of \$4 per hour
- **Increase productivity by 10%-20%** by getting the right materials to the right place at the right time
- **Increase operational efficiency by 20%-50%** by automating repetitive tasks, reducing downtime, and optimizing routing and scheduling

WHY PARTNERING WITH JBT IS A SMART MOVE:

7,000+ vehicles operating globally—700+ systems with millions of hours of stable operation—40+ years of application knowledge

- **Proven Technology From Industry Pioneers:** Unparalleled industry expertise from over four decades of designing and deploying high-quality, precision-engineered mobile automated systems
- **Solutions Tailored to Your Business:** A diverse range of automation solutions—including vehicles and fleet management software—that can be tailored to meet your industry's unique needs
- **Safety First and Always:** Safety starts with design then continues through implementation and support to protect your company's most valuable asset: your people
- **Exceptional Service Everywhere:** World-class customer support throughout the entire life cycle ensures your system continues to deliver superior results

Areas of Expertise

- Finished goods pallet transportation, storage, and retrieval
- Unit load handling
- Roll handling and stacking
- Inbound pallet identification and qualification
- Inventory tracking
- Aerosol, hazardous materials, and incompatible products

Applications

- Double-pallet drive-in rack
- Pallet transport (empty/finished goods)
- Rack storage and retrieval (push-back rack, select rack, drive-in rack, pallet flow)
- Pallet shuttle
- Block stack storage/staging
- Case/Layer picking replenishment and takeaway
- End-of-line retrieval
- Automatic trailer loading/unloading

mōt.OS®

FLEET MANAGEMENT SOFTWARE

JBT mōt.OS makes every mobile automation system SIMPLE, SCALABLE, and SUSTAINABLE

Our innovative software platform delivers seamless integration, transforming logistics and manufacturing operations.

SIMPLE

- User-friendly automation platform
- Intuitive monitoring and analytics
- Seamless horizontal and vertical integration

SCALABLE

- Fleet interoperability with performance and safety in scope
- Management of hundreds of vehicles and thousands of storage locations
- Site-to-enterprise mobile robot asset management

SUSTAINABLE

- Maximized total life cycle value via equipment and software asset management
- Flexible and redeployable technologies
- Decades of experience in complex automation environments
