

# PORTION CONTROL EQUIPMENT

Model No. PC-4, PS-7

Simple Solutions | *for a complex industry*

## PC-4 PORTION CUTTER

The PC-4 is a flexible portion control machine capable of producing a wide variety of products such as breast cubes, breast strips and split tenders.

It's customized product cavities and simple cutting method are designed specifically to meet your piece size or weight requirements.

3-Piece Tenders

**- REDUCE MANUAL KNIFE LABOR AND REHANDLING**

**- FLEXIBLE PLATFORM FOR MULTIPLE PRODUCTS**

Breast Strips

Breast Cubes

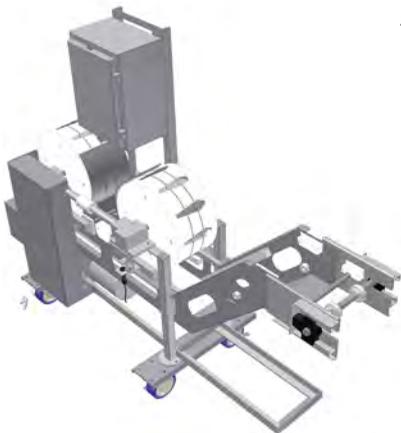

*High-volume operation?*

We can also configure the PC-4 with additional loading positions for higher outputs.

No matter the product type or portion size, we'll help to develop an efficient and safe portion control system that will significantly decrease your dependence on manual portioning labor.

## PS-7 TENDER PORTION SIZER

The PS-7 is a simple and efficient portion control machine designed to cut chicken tenders to meet any type of desired product specification.

It's simple & narrow design makes it flexible in any setting, on the cone line or off, and the removable product cavity wheels are engineered to meet your exact requirements for portion size.

PS-7 on Cone Line

**- REDUCE MANUAL KNIFE LABOR AND REHANDLING**

**- CONSISTENT END PRODUCT SIZE AND QUALITY**

We'll work with you to configure and customize your own portion sizing system based on your demands that will reduce manual labor, product rehandling and improve the efficiency of your operation.

We can also provide customized conveyor systems to transport raw materials and finished products to suit your processing needs.
