BottleTec™

JBT New Generation Extrusion Blow-Molder

JBT SF&DS® BottleTec™ Extrusion Blow-Molder

Innovative bottle designs can make your product stand out and lead to stronger brand recognition. Our BottleTec Extrusion Blow-Molder produces bottles in a wide variety of shapes and sizes with molds that are easily changed to accommodate different container designs.

The BottleTec produces lightweight HDPE bottles, which are available both in open, non-sterile and in closed, internally sterile versions. Bottles can range in size from 0.2 to 1.5 liters (6.75 - 50 fl oz).

The centerpiece of our BottleTec is the carousel, which contains the bottle molds. Depending on the capacity required (up to 7,500 bottles per hour) it is possible fit between 4 to 15 molds per carousel. The BottleTec can be converted to a different bottle mold in minimal time.

BottleTec units are designed to produce mono or multi-layer bottles with oxygen and UV light blocking layers to protect the product from external influences. In these cases the equipment will be supplied with extra extruders so that 3-layer bottles (UV barrier) or 6-layer bottles (UV and oxygen barrier) are produced in a co-extrusion process.

COUNT ON JBT TO HELP PROTECT YOUR INVESTMENT

JBT's greatest value in PRoCARE® services comes from preventing unexpected costs through smart, purposeful, and timely maintenance based on unmatched knowledge and expertise. PRoCARE service packages are offered as a maintenance agreement in various service levels, depending on your production and cost management requirements.
