

Fruit Cleaner 895

The first step to clean fruits and vegetables

At JBT, we understand the importance of washing your produce during the packing process. Through years of extensive research we have developed a portfolio of cleaners that effectively remove dirt and natural wax, but are gentle enough so they don't harm the produce surface. Fruit Cleaner 895 is a concentrated detergent specially formulated for general cleaning of fruits and vegetables. It contains a highly effective combination of surfactants, detergent builders, and alkalis to produce a cleaner with improved detergency and penetrating ability. Fruit Cleaner 895 can be sprayed or foamed over fruit and also used in soak tanks. This results in a cleaner produce surface ideal for the application of Sta-Fresh® protective coatings, improving appearance and enhancing the grade.

Product Features & Benefits

- Removes inorganic and natural wax deposits from produce surface
- Prepares produce surface for waxing
- Rinses off easily
- Safe on fruit
- Concentrated product that is easy to dilute
- Simple to use
