

# XTRs

Semi-automatic, two-station, rotary-table, tray sealing machine.

The successor to the GTR, the XTRs is capable of sealing 30 packs per minute with a 2 impression tool, without the need for compressed air. The all electric sealing creates a more consistent and efficient seal force with reduced energy usage and total running costs.

The user friendly design includes integrated HMI with multi-language settings, recipe driven control and automatic tool lock. Quick release tooling enables the user to switch from one tray size to another in less than 5 minutes. The machine itself is fully portable with an automatic film-feed and is available with optional 'free-flow' gas flush, Modified Atmosphere Packaging (MAP) to enable extended shelf life.

## XTRs Specifications

Height	1695mm
Standard Length	1257mm
Width	1240mm
Weight	446kg
Electrical Supply	200V 16A

## Features & Benefits

- Electric seal gives greater and more consistent seal force.
- PLC based temperature control.
- No compressed air required. Reduces energy usage and total cost of ownership.
- Fully graphical HMI with multi-language.
- Diagnostics and alerts displayed on HMI and recorded to audit trail.
- Recipe driven product change.
- Automatic tool lock.
- Open and hygienic design for ease of maintenance and cleaning.
- Tool loading from front of machine.
- Compatible with legacy GTR tooling.
- Optional features include MAP gas flush and print coding

## XTRs Sealing capacity

No. of Trays	Width	Length	Depth	Diameter
One	270mm	438mm	105mm	270mm
Two	270mm	207mm	105mm	207mm
Three	270mm	104mm	105mm	104mm
Four	270mm	71mm	105mm	71mm
