

A&B PROCESS SYSTEMS

Melt Systems

Ideal for applications melting butter, lard, chocolate gums and other solid products

JBT A&B Melt Systems are ideal for applications melting butter, lard, chocolate gums and other solid products and are designed with unique features for easy maintenance, reduced labor and improved safety. The ergonomic design of JBT A&B's self-contained melt system integrates melt and use stations and reduces manual lifting and dumping for improved safety. All melt systems are factory tested prior to shipment and work as well integrated into existing process facilities as they do in the new process applications.

We offer:

- Ergonomic design of integrated melt grid and use tank to eliminate manual lifting and dumping
- Two-stage melt systems available for applications where a fully melted product reservoir is desired. No need for agitation with this alternative approach
- Great for product reclaim/rework applications
- Modular and Clean-In-Place designs
- Custom scrape surface agitators available
- Meets all 3-A, USDA, cGMP, ASME (U&R), and FDA standards
- Factory Acceptance Testing (FAT) completed at JBT A&B prior to installation.

"All melt systems are not created equal."

COUNT ON JBT TO HELP PROTECT YOUR INVESTMENT

JBT's greatest value in PRO-CARE® services comes from preventing unexpected costs through smart, purposeful, and timely maintenance based on unmatched knowledge and expertise. PRO-CARE service packages are offered as a maintenance agreement in various service levels, depending on your production and cost management requirements.

JBT DIVERSIFIED FOOD & HEALTH
