

Brush Washer

The JBT Brush Washer is designed to remove dirt and debris from the exterior of citrus fruit

Technology & Function

As the fruit contacts the rotating brushes, the fruit begins to spin; this tumbling effect maximizes the surface area exposed to the scrubbing action and cleaning spray. The brush washer is constructed of stainless steel equipped with 27 brushes, two intake rollers and one discharge roller.

Features

- Heavy duty, stainless steel construction
- All chains and drives are fully guarded
- Fluid coupling mounted to motor to ensure “soft starts”
- Lubrication system to all brushes and rollers as well as to all idle and drive shaft support bearings
- Oiler to lubricate the drive chain
- All brushes and rollers supported by self-aligning, sealed ball bearings
