

Introducing  
the iOPS™ System  
from JBT.

**smarter.  
made simpler.**

# maximize

- equipment uptime
- profit per machine
- process efficiency/throughput
- labor productivity

# minimize

- equipment downtime
- maintenance expense
- cost of ownership
- labor shortage/turnover impact

# realize

- maximum return on investment
- optimum business results
- the promise of Industry 4.0

**This is a  
new cloud-based  
performance  
optimization platform.**

This is a secure big data analytics technology that gathers and analyzes your JBT equipment and process performance in real time.

This is a system that can inform your people when action's required, or automate that action for lightning-fast response.

This is a solution that will maximize uptime, productivity and profit. Painlessly.

Painlessly because you don't have to train your people to install or run it. We handle everything.

**This is the iOPS System.  
Only from JBT.**

optimize.

painlessly.

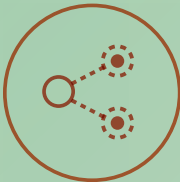

# The iOPS System.

Designed from the ground up to drive optimum performance.

## Advanced.

- ⦿ State of the art, ahead of the industry
- ⦿ Industry 4.0 technology
- ⦿ Enables AI, machine learning and automation technologies

## Flexible.

- ⦿ Can be tailored to individual KPIs
- ⦿ Multi-level automation
- ⦿ On-site and remote
- ⦿ Highly adaptable

## Secure.

- ⦿ Security designed in, not added on
- ⦿ Leading-edge data encryption, while in motion and in storage

## Effective.

- ⦿ Delivers meaningful insights to support timely action
- ⦿ Maximizes equipment/process performance and productivity
- ⦿ Minimizes total cost of ownership
